

Name: V.B.JOEL

Web Development using Java

Aim:

An online digital marketing website design using HTML ,CSS,PHP and JAVASCRIPT from scratch.

Output:

The screenshot shows a web browser window displaying a movie website template. The title 'BLACK ADAM' is prominently displayed at the top. On the left, there is a sidebar with navigation links: Home, Movie, Tv, Search, Account, Language (dropdown), and Sign In. The main content area features a movie poster for 'BLACK ADAM' with Dwayne Johnson as Black Adam. Below the poster, there is a summary of the movie's plot: 'Ancient Kahndaq, Teth Adam was bestowed the almighty powers of the gods. After using these powers for vengeance, he was imprisoned, becoming Black Adam. Nearly 5,000 years have passed, and Black Adam has gone from man to myth to legend. Now free, his unique form of justice, born out of rage, is challenged by modern-day heroes who form the Justice Society: Hawkman, Dr. Fate, Atom Smasher and Cyclone..'. A 'Check More' button is located below the plot summary. At the bottom, there is a section titled 'Trending Movies' with a 'see all' link and several movie posters.

<header> - semantic html tag which contains elements which form the header of the web-page.

<div> - it is a non-semantic tag used to group other elements.

<nav> - semantic tag to create a navigation bar.

<a> - used to embed an html link.

**** - defines an unordered list.

**** - defines a list item.

<form> - Defines an html form.

<h1> to **<h6>** - **<h1>** defines the most important heading. **<h6>** defines the least important heading

<p> - HTML paragraphs are defined with the **<p>** tag

<section> - it is a semantic element that can contain other elements to define a section.

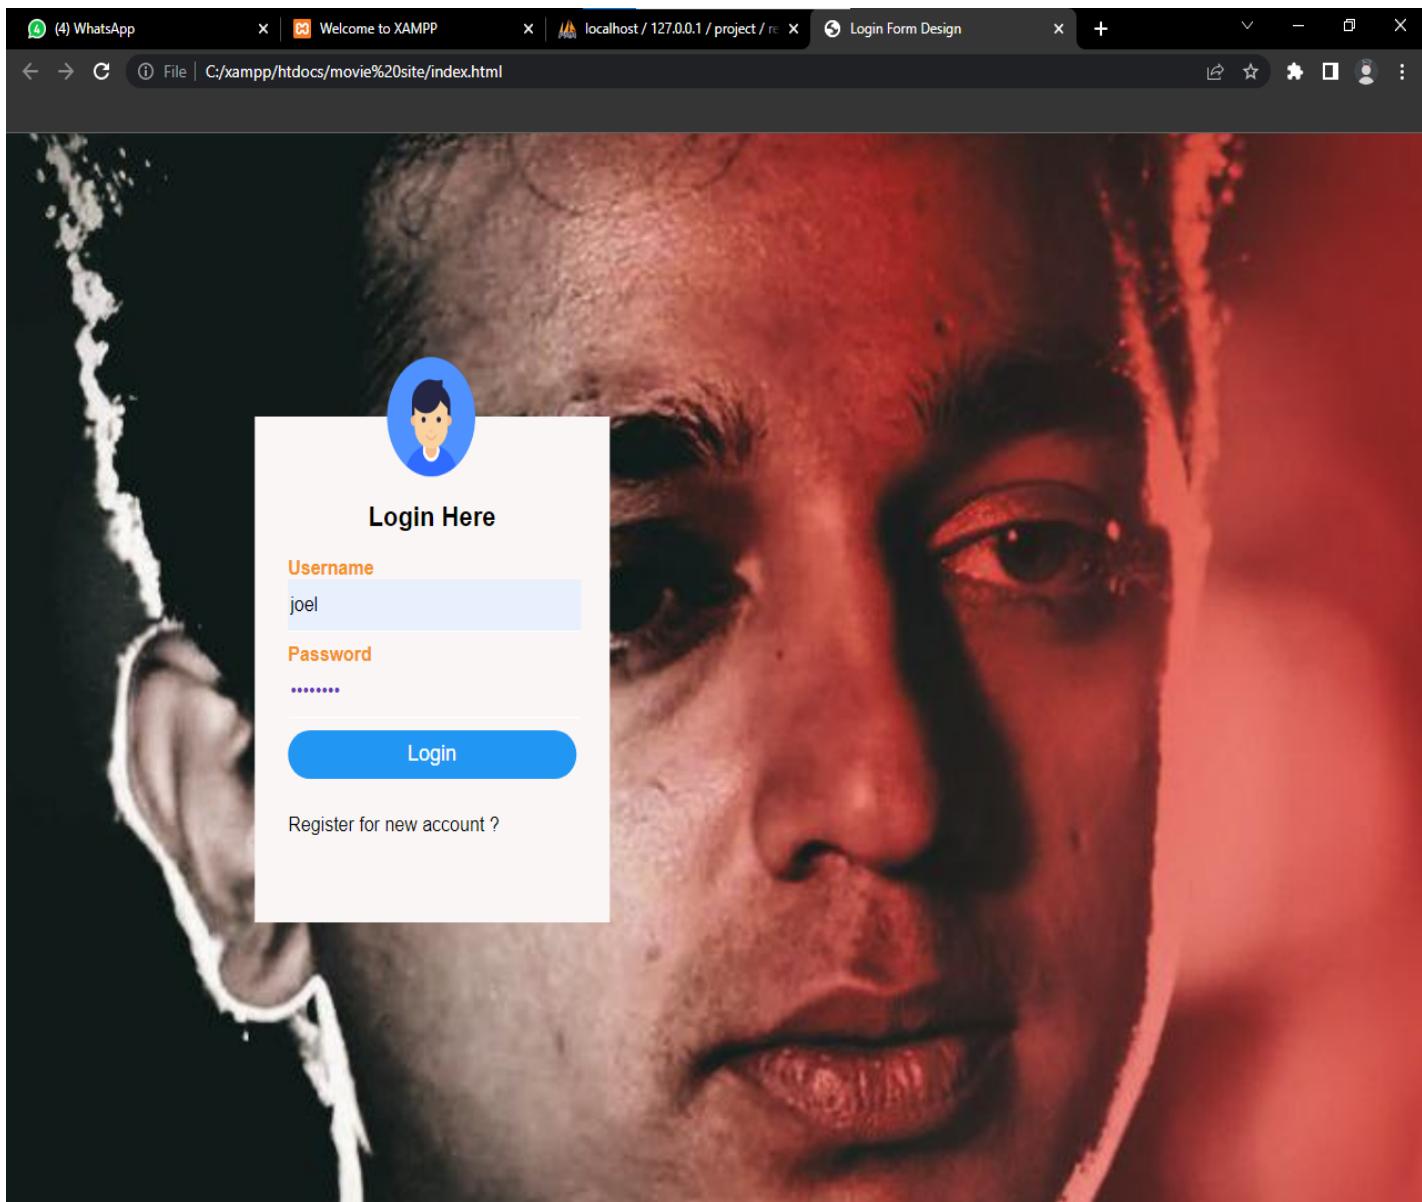

**** - Adds an image to the web-page.

<textarea> - Defines a resizable text-box.

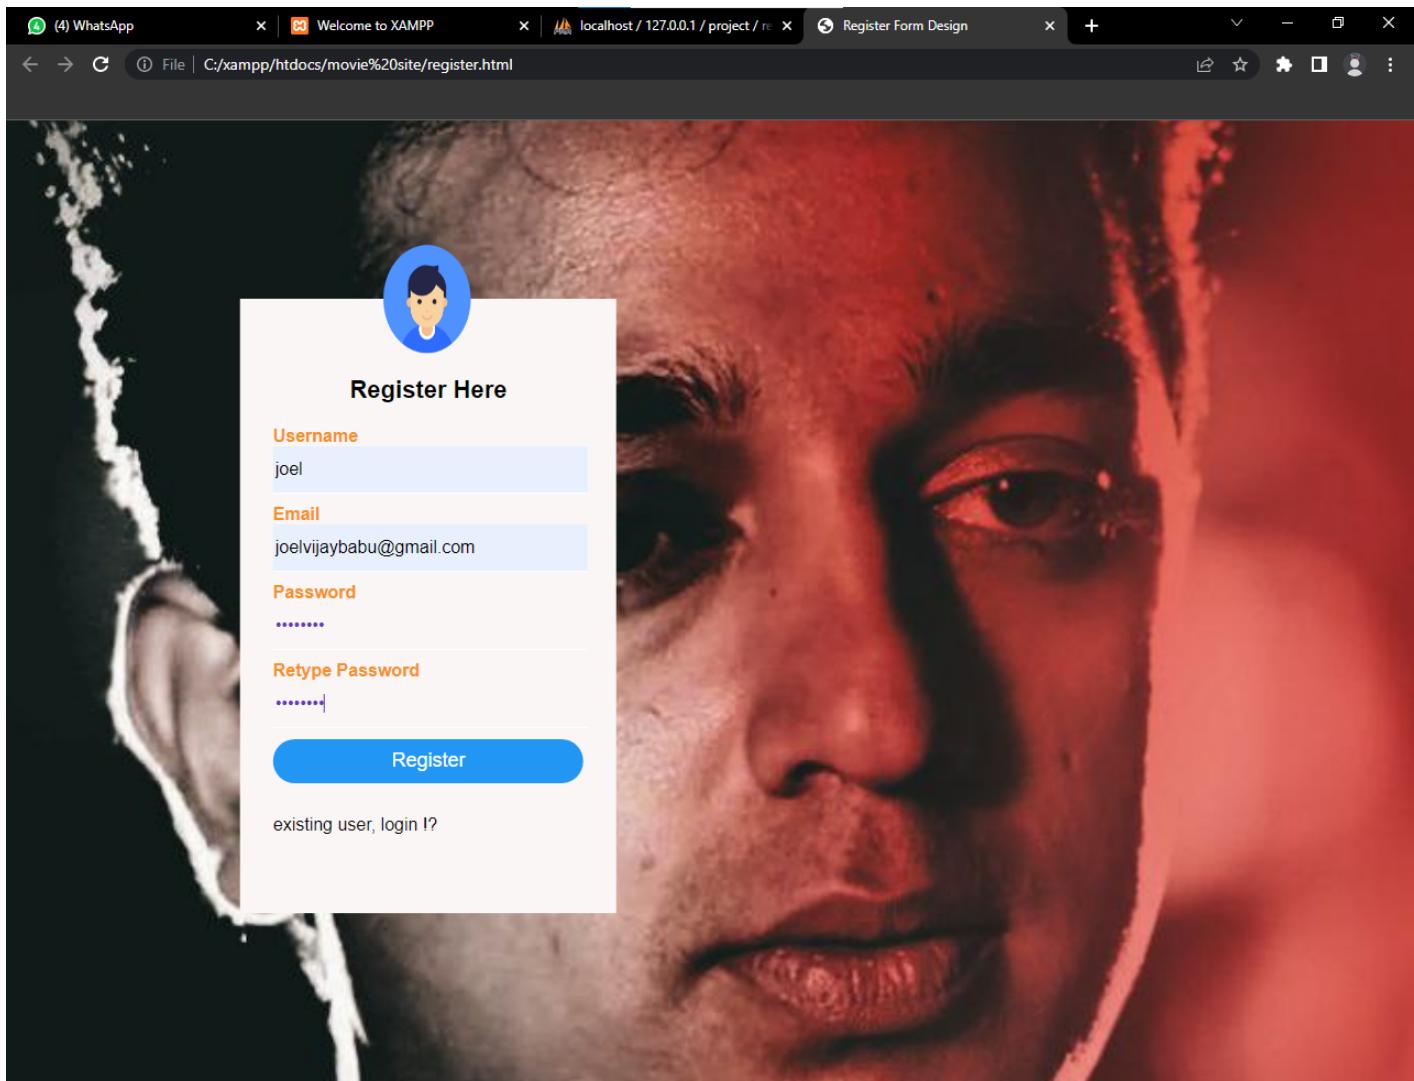

<script> - used to add JavaScript to the browser.

BACKEND DESIGN:

Login page:

Registration page:

Database:

The screenshot shows the phpMyAdmin interface for a MySQL database. The left sidebar lists databases: WhatsApp, Welcome to XAMPP, localhost / 127.0.0.1 / project / re, +, information_schema, mysql, performance_schema, phpmyadmin, project, and test. The 'project' database is selected. Inside 'project', there are three tables: New, login, and register. The 'register' table is currently selected, showing two rows of data.

Table Structure:

	uname1	email	upswd1	upswd2
<input type="checkbox"/>	joel	joelvijaybabu@gmail.com	12345678	12345678
<input type="checkbox"/>	mercy	mercy@gmail.com	12345678	12345678

SQL Query:

```
SELECT * FROM `register`
```

Buttons and Options:

- Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations
- Show all (checkbox), Number of rows: 25, Filter rows: Search this table, Sort by key: None
- Extra options: Check all, With selected: Edit, Copy, Delete, Export
- Show all (checkbox), Number of rows: 25, Filter rows: Search this table, Sort by key: None

Backend Design done by using php. A PHP developer is essentially a software developer that is proficient in using PHP and various technologies built using it. By default, a PHP developer can be **seen as a backend developer** as they most likely have experience using the following backend technologies.

- Linux
- Apache
- MySQL
- XAMPP

It is used to connect with front end design and the backend to retrieve some data.

Movie review system will collect the user data or the information and store it in the database. The database connectivity done successfully.

Conclusion:

Thus, the Movie Review website has been created using HTML, CSS, PHP and JavaScript .
